David Fady Farag

Data Analytics & Pipeline Engineer | Python ETL · SQL · Data Modeling · Power BI (PL-300)

El Mansoura, Dakahlia, Egypt | +20 101 230 2591 | David.Fady24@gmail.com | linkedin.com/in/david-fady24 | github.com/davidfady-24 | portfolio-ten-sepia-36.vercel.app

PROFESSIONAL SUMMARY

Computer Science student, **Microsoft Certified: Power BI Data Analyst Associate (PL-300)**, and **Data Analytics & Pipeline Engineer** with 3+ years of operational platform ownership and 2 years of hands-on experience designing **automated Python ETL pipelines, SQLite/SQL relational schemas, Dimensional Star Schema warehouses, quantitative signal engines, and multi-sheet BI reporting suites**. Proven track record building production data workflows for a **3,500+ member** digital marketplace that automated the ingestion, validation, and reporting of **213,750+ EGP** across **574 subscription records**. Graduate of the **MCIT Digital Egypt Pioneers Initiative (DEPI) Data Analyst Specialist** track and currently advancing through the **DEPI Data Engineering** track.

PROFESSIONAL EXPERIENCE

Founder & Data Automation Engineer | FUT Black Market — 01/2023 – Present | Remote

- Founded and scaled a **3,500+ member** digital trading community, architecting automated Python ETL pipelines, transaction ledgers, and executive BI dashboards to replace manual operations.
- Engineered an asynchronous Python (discord.py, Pandas, Regex, openpyxl) ETL pipeline with incremental snowflake state checkpointing and atomic file writes, processing **574 subscriptions** and **213,750 EGP** in cumulative revenue.
- Built automated data-quality validation (Data_Quality_Report) and cohort retention tracking, driving a **53.54% customer renewal rate**, **717.28 EGP average customer LTV**, **+25% community engagement**, and **+30% subscription conversion uplift**.
- Developed event-driven transaction and renewal notification bots that automated seller ledger tracking and reduced subscriber churn.

Data Engineering Trainee | Digital Egypt Pioneers Initiative (DEPI — MCIT) — 08/2026 – Present | Egypt

- Selected for the Ministry of Communications and Information Technology (MCIT) **Data Engineering** track focusing on Python data pipelines, relational warehousing, data quality enforcement, and analytical SQL modeling.
- Building modular **Python (Pandas, NumPy, SQLite) ETL workflows** with automated schema validation, hierarchical missing-value imputation, anomaly detection, and structured database loading tested via pytest.

Data Analyst Specialist Trainee | Digital Egypt Pioneers Initiative (DEPI — MCIT) — 06/2025 – 12/2025 | Egypt

- Completed the intensive 6-month MCIT **Data Analyst Specialist** track covering **T-SQL, Dimensional Data Modeling (Star Schema), Power BI (DAX, Power Query), Tableau, and Python (Pandas, Statsmodels, Scikit-learn)**.
- Scoped and delivered a verified **15,050 EGP ($315 USD)** commercial data automation contract, deploying an end-to-end Discord log extraction and multi-sheet Excel BI reporting pipeline.

PROJECTS

EA FC Quantitative Market Scanner, SQLite ETL & FastAPI Engine | Python, FastAPI, SQLite, Playwright, pytest — 2026

- Architected an installable Python package (pyproject.toml, CLI fut-market) and **FastAPI** backend that scrapes live FUTBIN and FUT.GG player price curves via **Playwright** and curl_cffi into a persistent **SQLite** database with strict time-window validation guards and **34 passing pytest unit/integration tests**.
- Computed statistical trading signals (**P15/P85 support/resistance percentiles, SMA-6h/24h crossovers, RSI-14, Bollinger volatility, Z-score**) adjusted for 5% tax, served via a Chart.js web terminal and automated 24/7 GitHub Actions Discord webhooks.

Discord Member Intelligence & Modular ETL Package (v2) | Python, discord.py, Pandas, openpyxl, Regex, pytest — 2025 – 2026

- Refactored a 1,129-line monolithic scraper into a clean, multi-package Python architecture (analytics, data, discord, reports, utils) with incremental snowflake state checkpointing, automated Data Quality Audit reporting, and **15-sheet Excel BI + HTML dashboard** generation (9/9 passing unit tests).

UK Train Rides Star Schema Warehouse, T-SQL & Demand Forecasting | T-SQL, Python, Tableau, Excel — 2025

- Modeled **31,653 UK railway journey records** (£742K revenue across 65 routes) into a normalized **7-table Star Schema** (Fact_TrainRides + 6 dimensions), authored **1,185 lines of analytical T-SQL**, and trained **SARIMAX and Prophet** models for passenger demand forecasting.

SQL Mastery & Python SQLite ETL Foundations | T-SQL, PostgreSQL, SQLite, Pandas, pytest — 2026

- Built production SQL scripts (**multi-CTE cohort retention matrices, NTILE/PERCENT_RANK RFM segmentation, window functions, SARGable indexing**) alongside an automated Python-to-SQLite passenger ETL pipeline with schema validation (3/3 passing unit tests).

EDUCATION

Bachelor of Computer Science | Mansoura University, Egypt — 09/2024 – Expected 06/2028

Relevant Coursework: Database Systems, Data Structures & Algorithms, Object-Oriented Programming (OOP), Statistics & Probability, Software Engineering, Discrete Mathematics.

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** — Microsoft (Issued Oct 2026 – Expires Oct 2027 | Credential ID: AF02F790E1DB3A20 | Cert #: 83B668-7BF96D)
- **Digital Egypt Pioneers Program (DEPI) — Data Analytics: Data Analyst Specialist** — Ministry of Communications & IT (MCIT), Egypt (Dec 2025)
- **Python for Data Analysis: Pandas & NumPy** — Coursera Project Network (Aug 2026 | Credential ID: DTNPUJI311AA)
- **Google Data Analytics: Foundations, Ask Questions, & Prepare Data for Exploration (3 Certificates)** — Google via Coursera (May – Jun 2026 | IDs: B6XY7T73YXGK, CW0GRVR5BUQJ, H8O90CEZVAVD)
- **SQL (Basic) Certificate of Accomplishment** — HackerRank (May 2026 | Credential ID: D81D81B8371F)

TECHNICAL SKILLS

Data Engineering, ETL & Automation: Python 3, ETL/ELT Pipeline Architecture, Incremental State Checkpointing, Web Scraping & Browser Automation (Playwright, BeautifulSoup4, curl_cffi), Asynchronous Bots (discord.py), REST APIs (FastAPI), Automated Testing (pytest), Regex Log Parsing, Git & GitHub Actions.

Databases & Data Modeling: SQL (T-SQL / SQL Server, PostgreSQL, SQLite), Dimensional Data Modeling (Star Schema, Fact & Dimension Tables), Common Table Expressions (CTEs), Window Functions, Query Optimization, Schema Validation & Data Quality Auditing.

Business Intelligence, Analytics & Languages: Microsoft Power BI (PL-300 Certified: DAX, Power Query), Tableau, Advanced Excel (openpyxl, Power Query, Pivot Tables), Pandas, NumPy, statsmodels (SARIMAX), Prophet, scikit-learn, Cohort/LTV/RFM Analytics | **Languages:** Arabic (Native), English (Fluent), German (Basic).
