# David Fady Farag

**Data & Business Intelligence Analyst | Microsoft Certified: Power BI (PL-300) | SQL · Python · Tableau**

El Mansoura, Dakahlia, Egypt | +20 101 230 2591 | David.Fady24@gmail.com | linkedin.com/in/david-fady24 | github.com/davidfady-24 | portfolio-ten-sepia-36.vercel.app

## PROFESSIONAL SUMMARY

**Microsoft Certified: Power BI Data Analyst Associate (PL-300)** and results-driven **Data & Business Intelligence Analyst** with 3+ years of operational leadership and 2 years of hands-on experience building end-to-end analytical reporting pipelines, Dimensional Star Schema data models, and interactive KPI dashboards using **SQL, Python, Power BI, Tableau, and Advanced Excel**. Proven track record as Founder & Lead Data Analyst of a **3,500+ member** digital marketplace, architecting automated Python ETL and 15-sheet Excel BI systems that tracked **213,750+ EGP** in revenue across **574 subscriptions**, achieved a **53.54% customer renewal rate**, and increased subscription conversions by **30%**. Graduate of the **MCIT Digital Egypt Pioneers Initiative (DEPI) Data Analyst Specialist** track and currently advancing through the **DEPI Data Engineering** track.

## PROFESSIONAL EXPERIENCE

**Founder & Lead Data Analyst** | FUT Black Market — 01/2023 – Present | Remote

- Founded and scaled a **3,500+ member** digital gaming marketplace and subscription community, owning commercial strategy, pricing analytics, cohort retention, and automated Business Intelligence reporting.
- Architected an automated **15-sheet Excel BI & HTML dashboard suite** powered by Python (Pandas, openpyxl, Regex, discord.py) tracking **213,750 EGP** in cumulative subscription revenue across **574 subscriptions** (491 paid, 45 giveaways).
- Conducted cohort retention, customer churn, and Lifetime Value (LTV) analysis, driving a **53.54% customer renewal rate** (returning subscribers generating **44.9%** of total revenue), an average customer LTV of **717.28 EGP**, and a **30% increase** in subscription conversion.
- Built quantitative market-monitoring models tracking real-time supply, demand, and price momentum across digital assets, increasing community engagement by **25%** and eliminating **100% of manual ledger data entry**.

**Data Engineering Trainee** | Digital Egypt Pioneers Initiative (DEPI — MCIT) — 08/2026 – Present | Egypt

- Selected for the Ministry of Communications and Information Technology (MCIT) **Data Engineering** track, building programmatic data ingestion, data transformation, and relational database warehousing workflows.
- Designing modular **Python (Pandas, NumPy, SQLite) ETL pipelines** incorporating automated schema validation, data quality auditing, deduplication, and unit testing (pytest).

**Data Analyst Specialist Trainee** | Digital Egypt Pioneers Initiative (DEPI — MCIT) — 06/2025 – 12/2025 | Egypt

- Completed the intensive 6-month MCIT **Data Analyst Specialist** program covering **SQL Server (T-SQL), Power BI (DAX, Power Query, Star Schema Data Modeling), Tableau, Python (Pandas, NumPy, Statsmodels, Scikit-learn), and Advanced Excel**.
- Delivered a verified **15,050 EGP ($315 USD)** commercial data automation & BI contract, scoping and deploying an automated Discord-to-Excel subscription intelligence pipeline for production business operations.

## PROJECTS

**Discord Member Intelligence & Automated BI Suite (v2)** | Python, Pandas, openpyxl, Regex, JSON, pytest — 2025 – 2026

- Engineered a modular Python BI package that ingests unstructured YAGPDB bot event logs via incremental snowflake checkpointing and transforms them into a structured **15-sheet Excel BI workbook**, standalone **HTML executive dashboard**, and automated **Data Quality Audit report** (9/9 passing unit tests).

**UK Train Rides Operational BI, Star Schema & Demand Forecasting** | T-SQL, Python, Tableau, Excel — 2025

- Analyzed **31,653 UK National Rail ticket records** (£742K revenue across 65 routes, £38.7K delay refund losses) by designing a normalized **7-table Star Schema** (Fact_TrainRides + 6 dimension tables) and writing a **1,185-line analytical T-SQL script**.
- Trained **SARIMAX and Prophet** time-series demand forecasting models and built interactive **Tableau** operational dashboards to optimize route scheduling and reduce delay refunds.

**EA FC Quantitative Market Scanner, SQLite ETL & FastAPI Engine** | Python, FastAPI, SQLite, Playwright, Chart.js — 2026

- Built an automated market ingestion and quantitative signal pipeline scraping real-time player price curves into **SQLite** with strict time-window validation guards and **34 passing pytest unit tests**.
- Programmed statistical trading indicators (**P15/P85 support/resistance percentiles, SMA-6h/24h crossovers, RSI-14, Bollinger volatility, Z-score mean reversion**) adjusted for 5% marketplace tax, served via a FastAPI + Chart.js web dashboard and 24/7 Discord webhook alerts.

**SQL Mastery & Analytical Data Modeling Library** | T-SQL, PostgreSQL, SQLite — 2026

- Authored a production SQL query library covering **multi-CTE subscription cohort retention matrices, RFM customer segmentation (NTILE, PERCENT_RANK), window functions (ROW_NUMBER, DENSE_RANK, LAG, LEAD), Star Schema KPIs, and data deduplication patterns**.

## EDUCATION

**Bachelor of Computer Science** | Mansoura University, Egypt — 09/2024 – Expected 06/2028

**Relevant Coursework:** Database Systems, Data Structures & Algorithms, Statistics & Probability, Object-Oriented Programming (OOP), Software Engineering, Discrete Mathematics.

## CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** — Microsoft (Issued Oct 2026 – Expires Oct 2027 | Credential ID: AF02F790E1DB3A20 | Cert #: 83B668-7BF96D)
- **Digital Egypt Pioneers Program (DEPI) — Data Analytics: Data Analyst Specialist** — Ministry of Communications & IT (MCIT), Egypt (Dec 2025)
- **Python for Data Analysis: Pandas & NumPy** — Coursera Project Network (Aug 2026 | Credential ID: DTNPUJI311AA)
- **Google Data Analytics: Foundations, Ask Questions, & Prepare Data for Exploration (3 Certificates)** — Google via Coursera (May – Jun 2026 | IDs: B6XY7T73YXGK, CW0GRVR5BUQJ, H8O90CEZVAVD)
- **SQL (Basic) Certificate of Accomplishment** — HackerRank (May 2026 | Credential ID: D81D81B8371F)

## TECHNICAL SKILLS

**Business Intelligence & Visualization:** Microsoft Power BI (PL-300 Certified: DAX, Power Query / M, Dataflows, Star Schema Modeling, Executive KPI Dashboards), Tableau, Advanced Microsoft Excel (Pivot Tables, Power Query, Dynamic Formulas, Automated openpyxl Reporting), Chart.js.

**Programming, ETL & Databases:** SQL (T-SQL / SQL Server, PostgreSQL, SQLite — Complex Joins, CTEs, Window Functions, Query Optimization), Python 3 (Pandas, NumPy, statsmodels, Prophet, scikit-learn, openpyxl, Regex, FastAPI, Playwright, discord.py, pytest), Git, GitHub Actions, REST APIs, JSON/CSV ETL.

**Analytics Methodologies & Languages:** Exploratory Data Analysis (EDA), Cohort Retention & Churn Analysis, Customer LTV & RFM Segmentation, Time-Series Demand Forecasting (SARIMAX, Prophet), Data Cleaning & Data Quality Auditing, A/B & Statistical Analysis | **Languages:** Arabic (Native), English (Fluent), German (Basic).
